HOME CARE INSTRUCTIONS FOR NAIL SURGERY

Leave dressing on for the remainder of that day following surgery. Remove prior to showering the next day. Some bloody drainage may be seen.

For The first 3 days wash toe with warm soapy water, showering or bathing is fine. After washing toe, apply peroxide and Neosporin ointment, and put on a band aid. On the 4th day begin taking the band-aid off at night to allow the area to dry.

Take your prescription as directed, if given.

If you have any questions or problems before your follow-up visit, please do not hesitate to contact our office or call our emergency number at (314) 719-9709.
